Statif Pro DReam

OVERVIEW

The **Statif Pro DReam** is a new radiographic concept equipped with a Flat Panel Detector (FPD) that enables instantaneous display, image processing and network capabilities: archiving and printing.

Thanks to its small footprint, the **Statif Pro DReam** allows a wide range of procedures in a compact design. The **Statif Pro DReam** excels in advanced features and user-friendly interface. Workflow and productivity are key points of the equipment and enhance the quality of patient care.

The FPD ensures outstanding images at lower dose to emphasize a relevant diagnosis.

AUTO-POSITIONING

CUSTOMIZED PROTOCOLS

- Possibility to program positions of the statif: SID, tube, arm and detector positions and collimator size.
- Auto-positioning from the anatomical protocol on the acquisition console.

SAFETY FEATURES

Intelligent anti-collision system, which automatically moves backwards when entering in contact with any object and actuating in any position of the system. These key features simplify patient positioning and make it safer.

Safety light beams detect the patient on the table and disable all movements except for arm upwards.

Statif Pro DReam

MULTIPURPOSE

STATIF PRO DREAM FOR YOUR DAILY PROJECTIONS

The **Statif Pro DReam** has preset positions with the right projection angles, dedicated to extremity procedures for a convenient patient positioning

The **Statif Pro DReam** moves automatically to any position such as chest procedures with 180 cm SID or cross lateral examinations on trolley

The **Statif Pro DReam** has a wide vertical travel to perform standing exams from head to foot.

FULLY DIGITAL

WITH THE PORTABLE FPD, EVERYTHING IS DIGITAL

Standing feet on FPD: the tube can be rotated for exposure on **the portable FPD**

Skyline patellars radiography with **the portable FPD** becomes a routine procedure.

With **the portable FPD**, advanced examinations are possible such as hip joint.

Statif Pro DReam

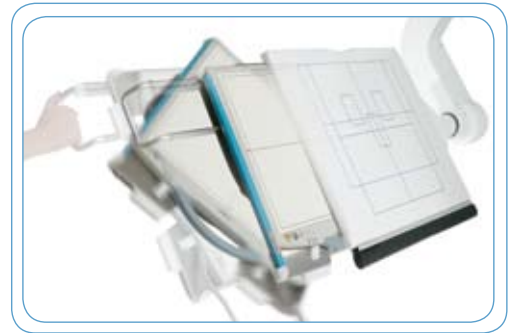

USER-FRIENDLY

ADVANCED FEATURES FOR THE HIGHEST STANDARD IN X-RAY IMAGING

Large FPD of 43 x 43 cm active area for general radiography procedures.

Portable FPD of 35 x 43 cm is particularly thin and lightweight for easy patient positioning.

CONTROL SOLUTIONS

Infra red remote for controlling the system from anywhere.

DReam control station (option): on/off, system positioning and emergency stop.

MOBILE ELEVATING TABLE (OPTIONAL)

- Floating tabletop
- Motorized elevation
- Batteries powered

IMAGE PROCESSING

TOUCH SCREEN ACQUISITION WORKSTATION

The intuitive user interface is easy to operate with unlimited preset anatomical programs in one single touch. High quality preview images are available within 3 seconds prior to transmission or printout standardized DICOM interface. Powerful processing is available.

STITCHING (OPTIONAL): SPINE AND LONG BONE IMAGING

The **Statif Pro DReam** allows two to five images to be pasted together. The positioning stand keeps patient comfortable during the acquisition.

DREAMVIEW POST PROCESSING CONSOLE (OPTIONAL)

The DReamview is a multi-modality console that includes tools and measures for accurate diagnosis.

Motorized SID	from 100 to 180 cm
Motorized vertical movement	126.5 cm
Motorized arm rotation	+ 120°/- 30°
Tube rotation	+/- 180°
Customizable automatic positioning	
Anti-collision safety features	
Bucky tilting	+/- 45°
Grid	Removable
Patient table	70 x 200 x 65 cm
Elevating table (optional)	57.5 to 84 x 200 x 65.5 cm

Compatible CR or Cassette size DR
